

G0 - Top-level MR-C6 / DEC-C6-01

Top-level accepted projection: produce, realize and system-to-environment dependOn. Environment composition and FR-level detail are intentionally omitted.

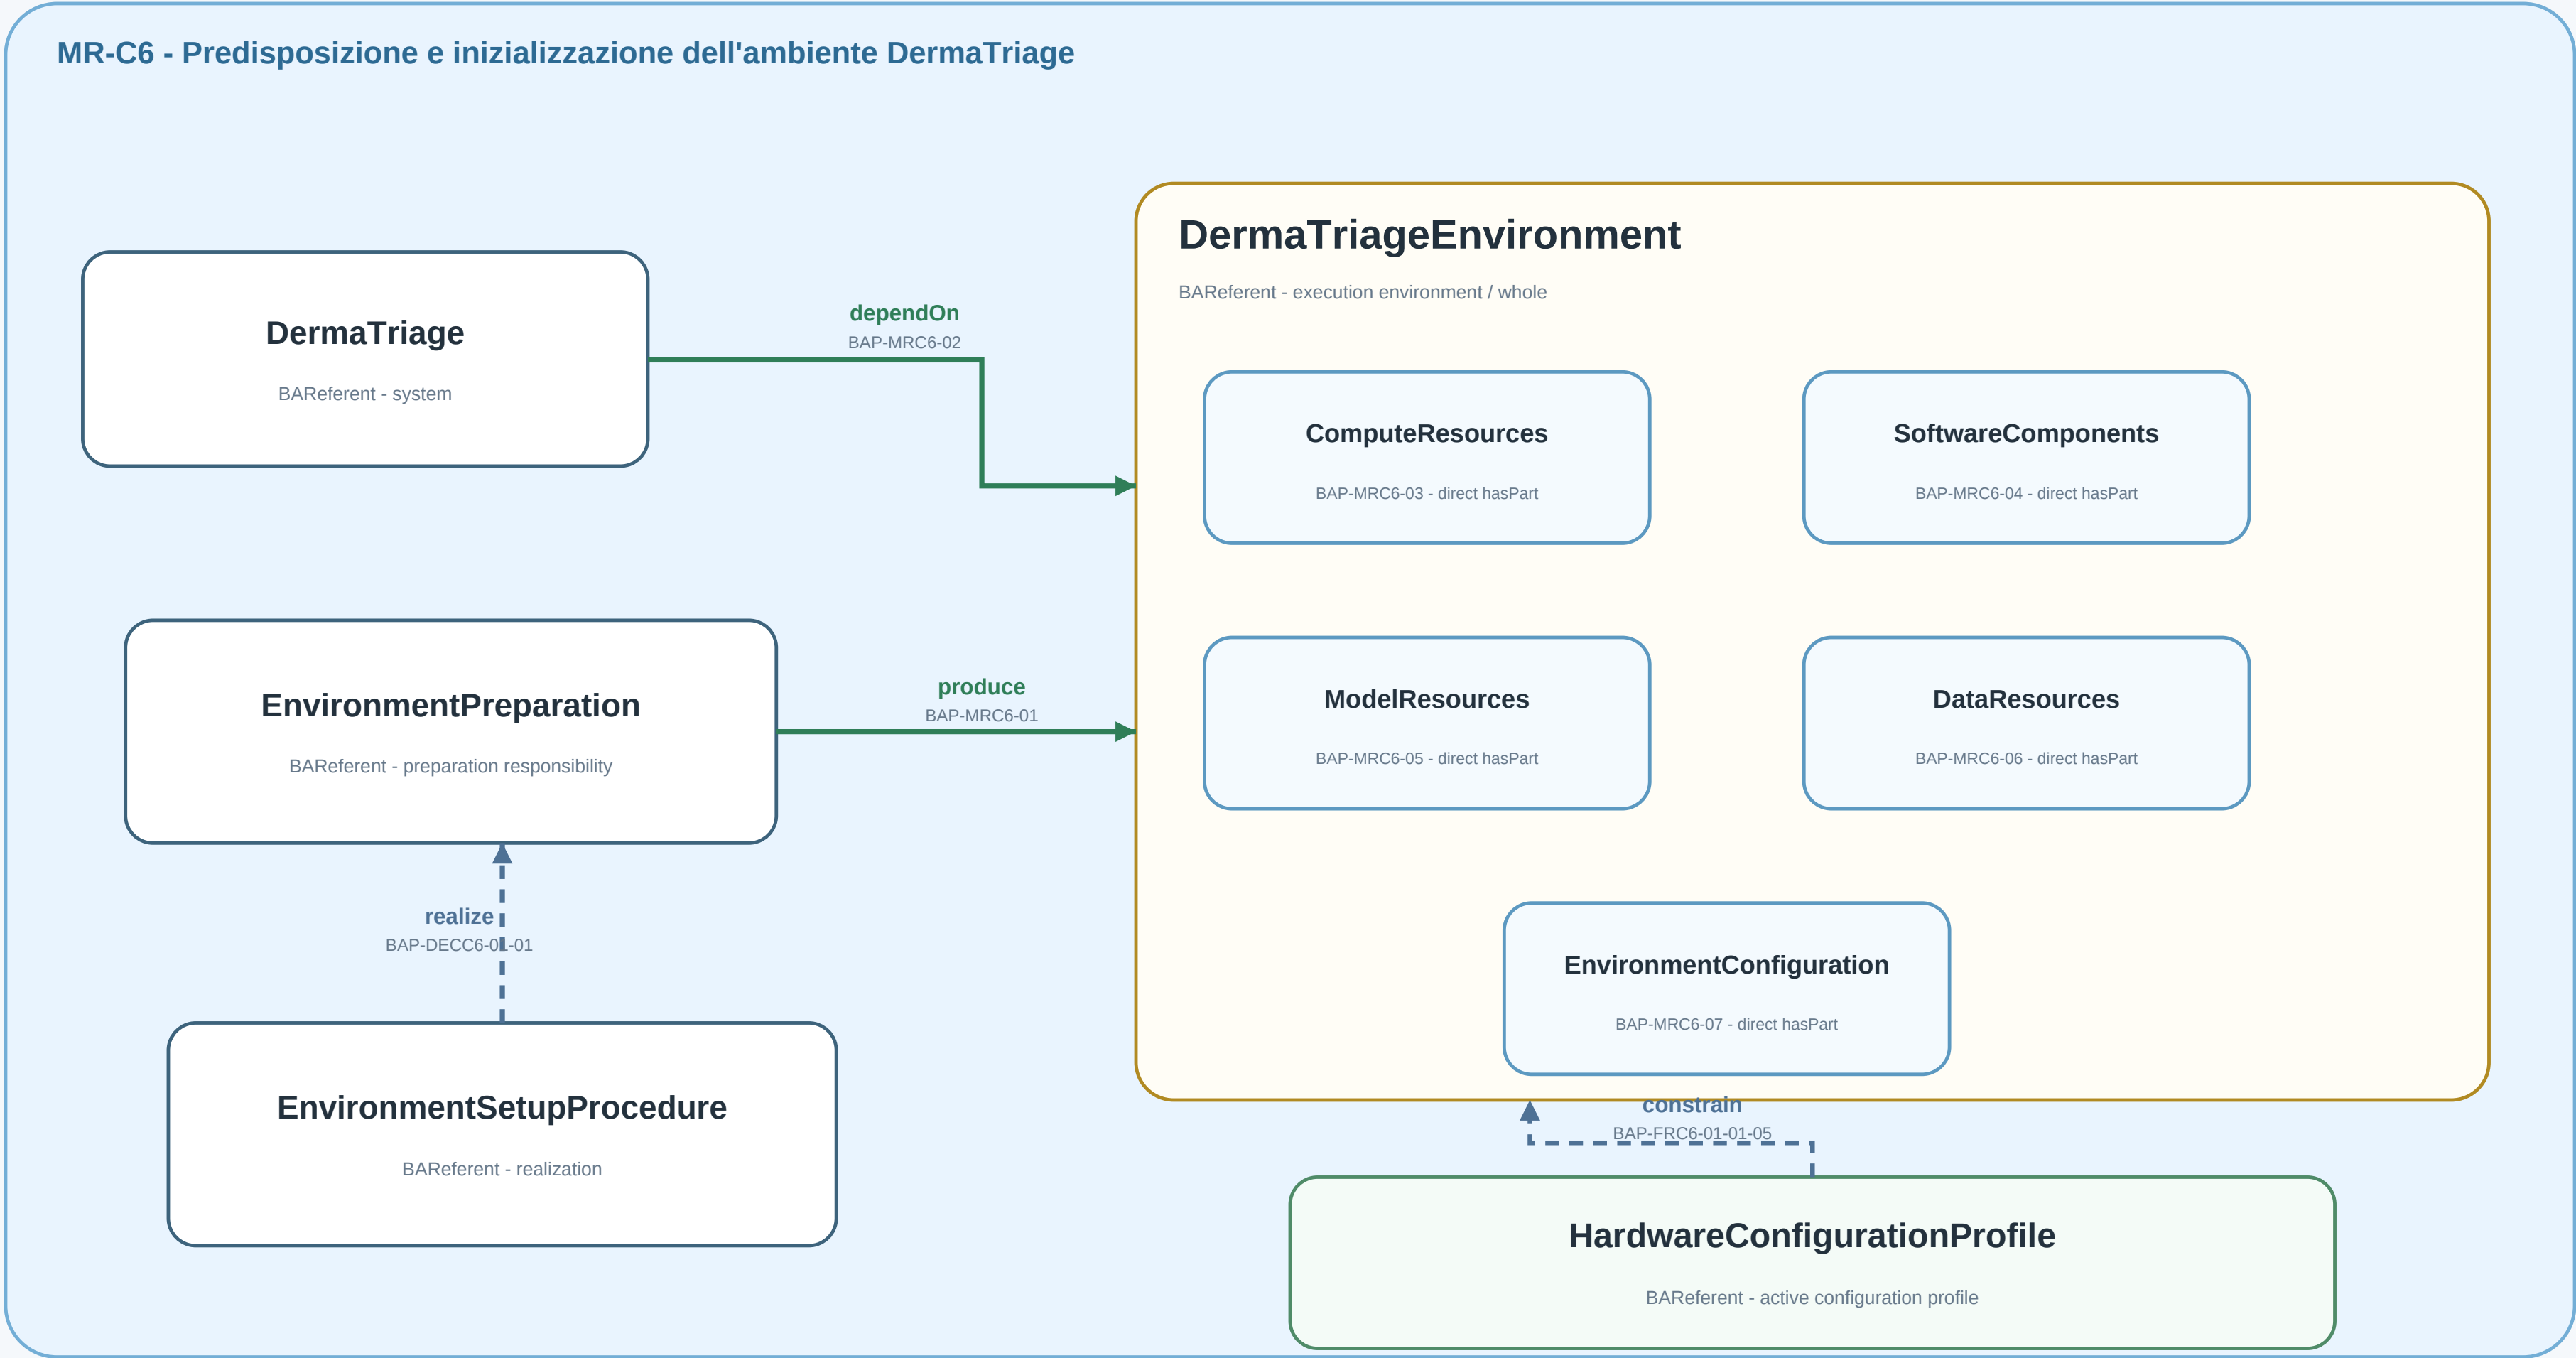

G1 - MR-C6 environment composition

G0 plus direct MR-C6 hasPart composition. Containment inside DermaTriageEnvironment is semantic; FR-level constraints are intentionally omitted.

G2 - FR-C6-01-01 named hardware configuration constraint

G1 plus accepted BAP-FRC6-01-01-05: HardwareConfigurationProfile constrains DermaTriageEnvironment. Numeric profile detail remains outside this level; former candidate procedure-to-resource dependencies remain absent.

G2 - adds only the accepted named configuration constraint; former FR-C6-01-01 candidate dependOn edges are absent.

G3 - FR-C6-01-02 software availability and current composition

G2 plus accepted named BAP-FRC6-01-02-01 and accepted BAP-FRC6-01-02-02: RequiredSoftwareDependencies is the governed logical configuration and SCP-C6-01-02/requirements.txt is its current concrete realization through canonical realize. Every visible semantic edge is derived from an accepted BAProposition.
