

BA0-R bibliography expansion ledger

Revision 2 - REVIEW-ONLY

Candidate	Origin	Class	Why it may matter	Decision after BA0-R9
Reinhartz-Berger & Dori reflective OPM metamodel (2005)	SRC-0046	Foundational / Challenge	Explicit compact reflective metamodel	READ as SRC-0047
Dori, Object-Process Methodology (2002)	SRC-0047	Foundational	Broader lifecycle/refinement theory	DEFER; reflective metamodel suffices for BA0
Dori & Reinhartz-Berger OPM development-process metamodel (2003)	SRC-0047	Foundational	Development/evolution process semantics	DEFER unless BA3 needs it
ISO 19450:2024 full text	SRC-0047	Normative access	Current OPM clause-level semantics	DEFER unless normative OPM claims needed
Long, Relationships between Common Graphical Representations in Systems Engineering	SRC-0046	Comparing	View/projection mapping	MEDIUM; main BA0 point already established
OOSEM foundational sources	SRC-0046	Foundational	Needs to logical/allocated architecture	DEFER; survey sufficient for BA0
Harmony-SE / SysML Deskbook	SRC-0046	Alternative	Function/state allocation	DEFER unless BA1 remains contested
JPL State Analysis	SRC-0046	Alternative	State-centered representation	DEFER unless State/Mode decisive
ISO/IEC/IEEE 42010:2022 full text	SRC-0043	Normative access	Clause-level architecture-description/viewpoint claims	ACQUIRE VIA UNIVERSITY; regression source when supplied
ArchiMate 3.2 licensed full text	SRC-0045	Normative access	Normative active/behavior/passive semantics	LOW PRIORITY
SAE AS5506 current AADL standard	SRC-0044	Normative access	Current AADL semantics	DEFER unless AADL-specific claims required

1 Bounded-search decision

BA0-R9 closes the planned alternative semantic-kernel challenge: OPM supplies the missing compact-ontology counterexample. No additional second-ring source should be added before BA0 unless (1) user-provided ISO 42010 full text materially changes view/viewpoint conclusions, or (2) BA0/BA1 produces a concrete unresolved semantic question that the current corpus cannot answer.
