

DDTA - Scheda di lettura compilata

SRC-0043 - BA0-R systems-modeling prior art

REVIEW-ONLY: da approvare prima del caricamento nel repository.

Identita bibliografica e accesso

Source ID	SRC-0043
Titolo	ISO/IEC/IEEE 42010:2022 - Software, systems and enterprise — Architecture description
Autori/ente	ISO; IEC; IEEE
Anno	2022
Identificatore	ISO/IEC/IEEE 42010:2022, Edition 2, 2022-11
Accesso	paywalled_normative_text
Verification state	access_limited_official_abstract_plus_conceptual_model

ACCESS-LIMITED

Normative full text is sold by ISO; not obtained in this review. Official abstract plus public 42010 conceptual-model companion were reviewed. Il worksheet non attribuisce al testo normativo non accessibile affermazioni clause-level.

1. Research problem and contribution

The official abstract specifies requirements for architecture descriptions, frameworks, languages, viewpoints and model kinds. It explicitly distinguishes the architecture of an entity of interest from the architecture description expressing it and does not prescribe a modeling method, notation, tool, format or medium.

2. Starting artifacts and generated representations

The public conceptual-model companion for the 2022 edition shows Entity of Interest, Stakeholders, Perspectives, Concerns, Viewpoints, Views, View Components and Architecture Aspects. Historical public conceptual-model material also documents correspondences and architecture decisions/rationale. These companion pages are not a substitute for the normative clauses.

3. Traceability, change, automation and human role

The official abstract establishes architectural concepts and their relationships as contents of an architecture description. The companion conceptual model presents correspondences for consistency/traceability and decisions/rationale, but this review cannot claim specific 2022 normative requirements beyond the official abstract without the purchased standard.

4. Findings, limitations and relationship with DDTA

Strongly supports architecture/model/view separation and viewpoint-driven projections. It prevents DDTA from presenting concern-oriented views or architecture decisions/rationale as inherently novel. ACCESS LIMITATION: no clause-level claims or PDF page citations are made from the 2022 normative standard.

Evidenza utile per BA0/BA1

Pag.	Ruolo	Sezione	Interpretazione DDTA
web	foundation	Official ISO abstract	Representation and view governance are established architecture-description prior art.
web	comparison	Public 42010 conceptual model - 2022 overview	Views are organized around concerns/aspects, which DDTA must treat as prior art rather than novelty.

Pag.	Ruolo	Sezione	Interpretazione DDTA
web	challenge	Public 42010 conceptual model - correspondences	Cross-view/model consistency links are established prior art adjacent to DDTA provenance.

Bibliography mining / follow-up

- Purchase/library access to ISO/IEC/IEEE 42010:2022 if clause-level thesis claims are needed
- ISO/IEC/IEEE 42010 public conceptual model
- ISO/IEC/IEEE 15288 for lifecycle/system process context

Governance note

Questa scheda è un ausilio di review. Le future citazioni di tesi devono risolversi alla fonte registrata e a una posizione esatta nell'excerpt ledger approvato. Nessun concetto esterno diventa automaticamente un BAE DDTA.
