

DDTA - Scheda di lettura compilata

SRC-0045 - BA0-R systems-modeling prior art

REVIEW-ONLY: da approvare prima del caricamento nel repository.

Identita bibliografica e accesso

Source ID	SRC-0045
Titolo	ArchiMate 3.2 Specification
Autori/ente	The Open Group
Anno	2022
Identificatore	ArchiMate 3.2, released October 2022
Accesso	licensed_full_text_not_obtained
Verification state	access_limited_license_plus_authoritative_open_guide

ACCESS-LIMITED

Full specification requires personal/member/evaluation/non-commercial/commercial license. The review uses official licensing metadata and The Open Group Community ArchiMate 101 guide; it does not claim full normative-spec reading. Il worksheet non attribuisce al testo normativo non accessibile affermazioni clause-level.

1. Research problem and contribution

The Open Group describes ArchiMate as an independent enterprise-architecture modeling language. Official access requires accepting a personal or organizational license. An authoritative Open Group Community guide provides a practical non-normative introduction to its generic metamodel.

2. Starting artifacts and generated representations

The open guide distinguishes Active Structure, Behavior and Passive Structure. Passive structure represents stocks/information/goods acted upon by behavior. It distinguishes Flow, Triggering and Serving relationship semantics and then specializes the generic concepts into business, application and technology layers.

3. Traceability, change, automation and human role

The reviewed open guide emphasizes viewpoints/views and a constrained metamodel but is not a lifecycle/governance specification. No DDTA-style provenance conclusions should be attributed to the inaccessible normative 3.2 text.

4. Findings, limitations and relationship with DDTA

The generic Active/Behavior/Passive split is a strong independent challenge to Asset as a root and Interaction as one universal relation. It suggests “asset” is a security interpretation of more neutral passive/information objects. ACCESS LIMITATION: all substantive semantic statements in this sheet are attributed to the open Open Group Community guide, not claimed as clause-level 3.2 normative text.

Evidenza utile per BA0/BA1

Pag.	Ruolo	Sezione	Interpretazione DDTA
web	access	Official ArchiMate 3.2 licensed-download page	Full normative reading is not available in this review package.
web	comparison	ArchiMate 101 - generic metamodel	A generic system core can distinguish structural performer, behavior and passive information/object semantics.
web	challenge	ArchiMate 101 - flows, triggering, serving	Interaction is too broad as a single relation family.

Bibliography mining / follow-up

- Obtain ArchiMate 3.2 under appropriate personal/non-commercial license if normative claims become necessary
- The Open Group ArchiMate 101 open guide
- ArchiMate viewpoint documentation for BA4 comparison

Governance note

Questa scheda è un ausilio di review. Le future citazioni di tesi devono risolversi alla fonte registrata e a una posizione esatta nell'excerpt ledger approvato. Nessun concetto esterno diventa automaticamente un BAE DDTA.
