

G0 - Top-level MR-C6 / DEC-C6-01

Top-level accepted projection: produce, realize and system-to-environment dependOn. Environment composition and FR-level detail are intentionally omitted.

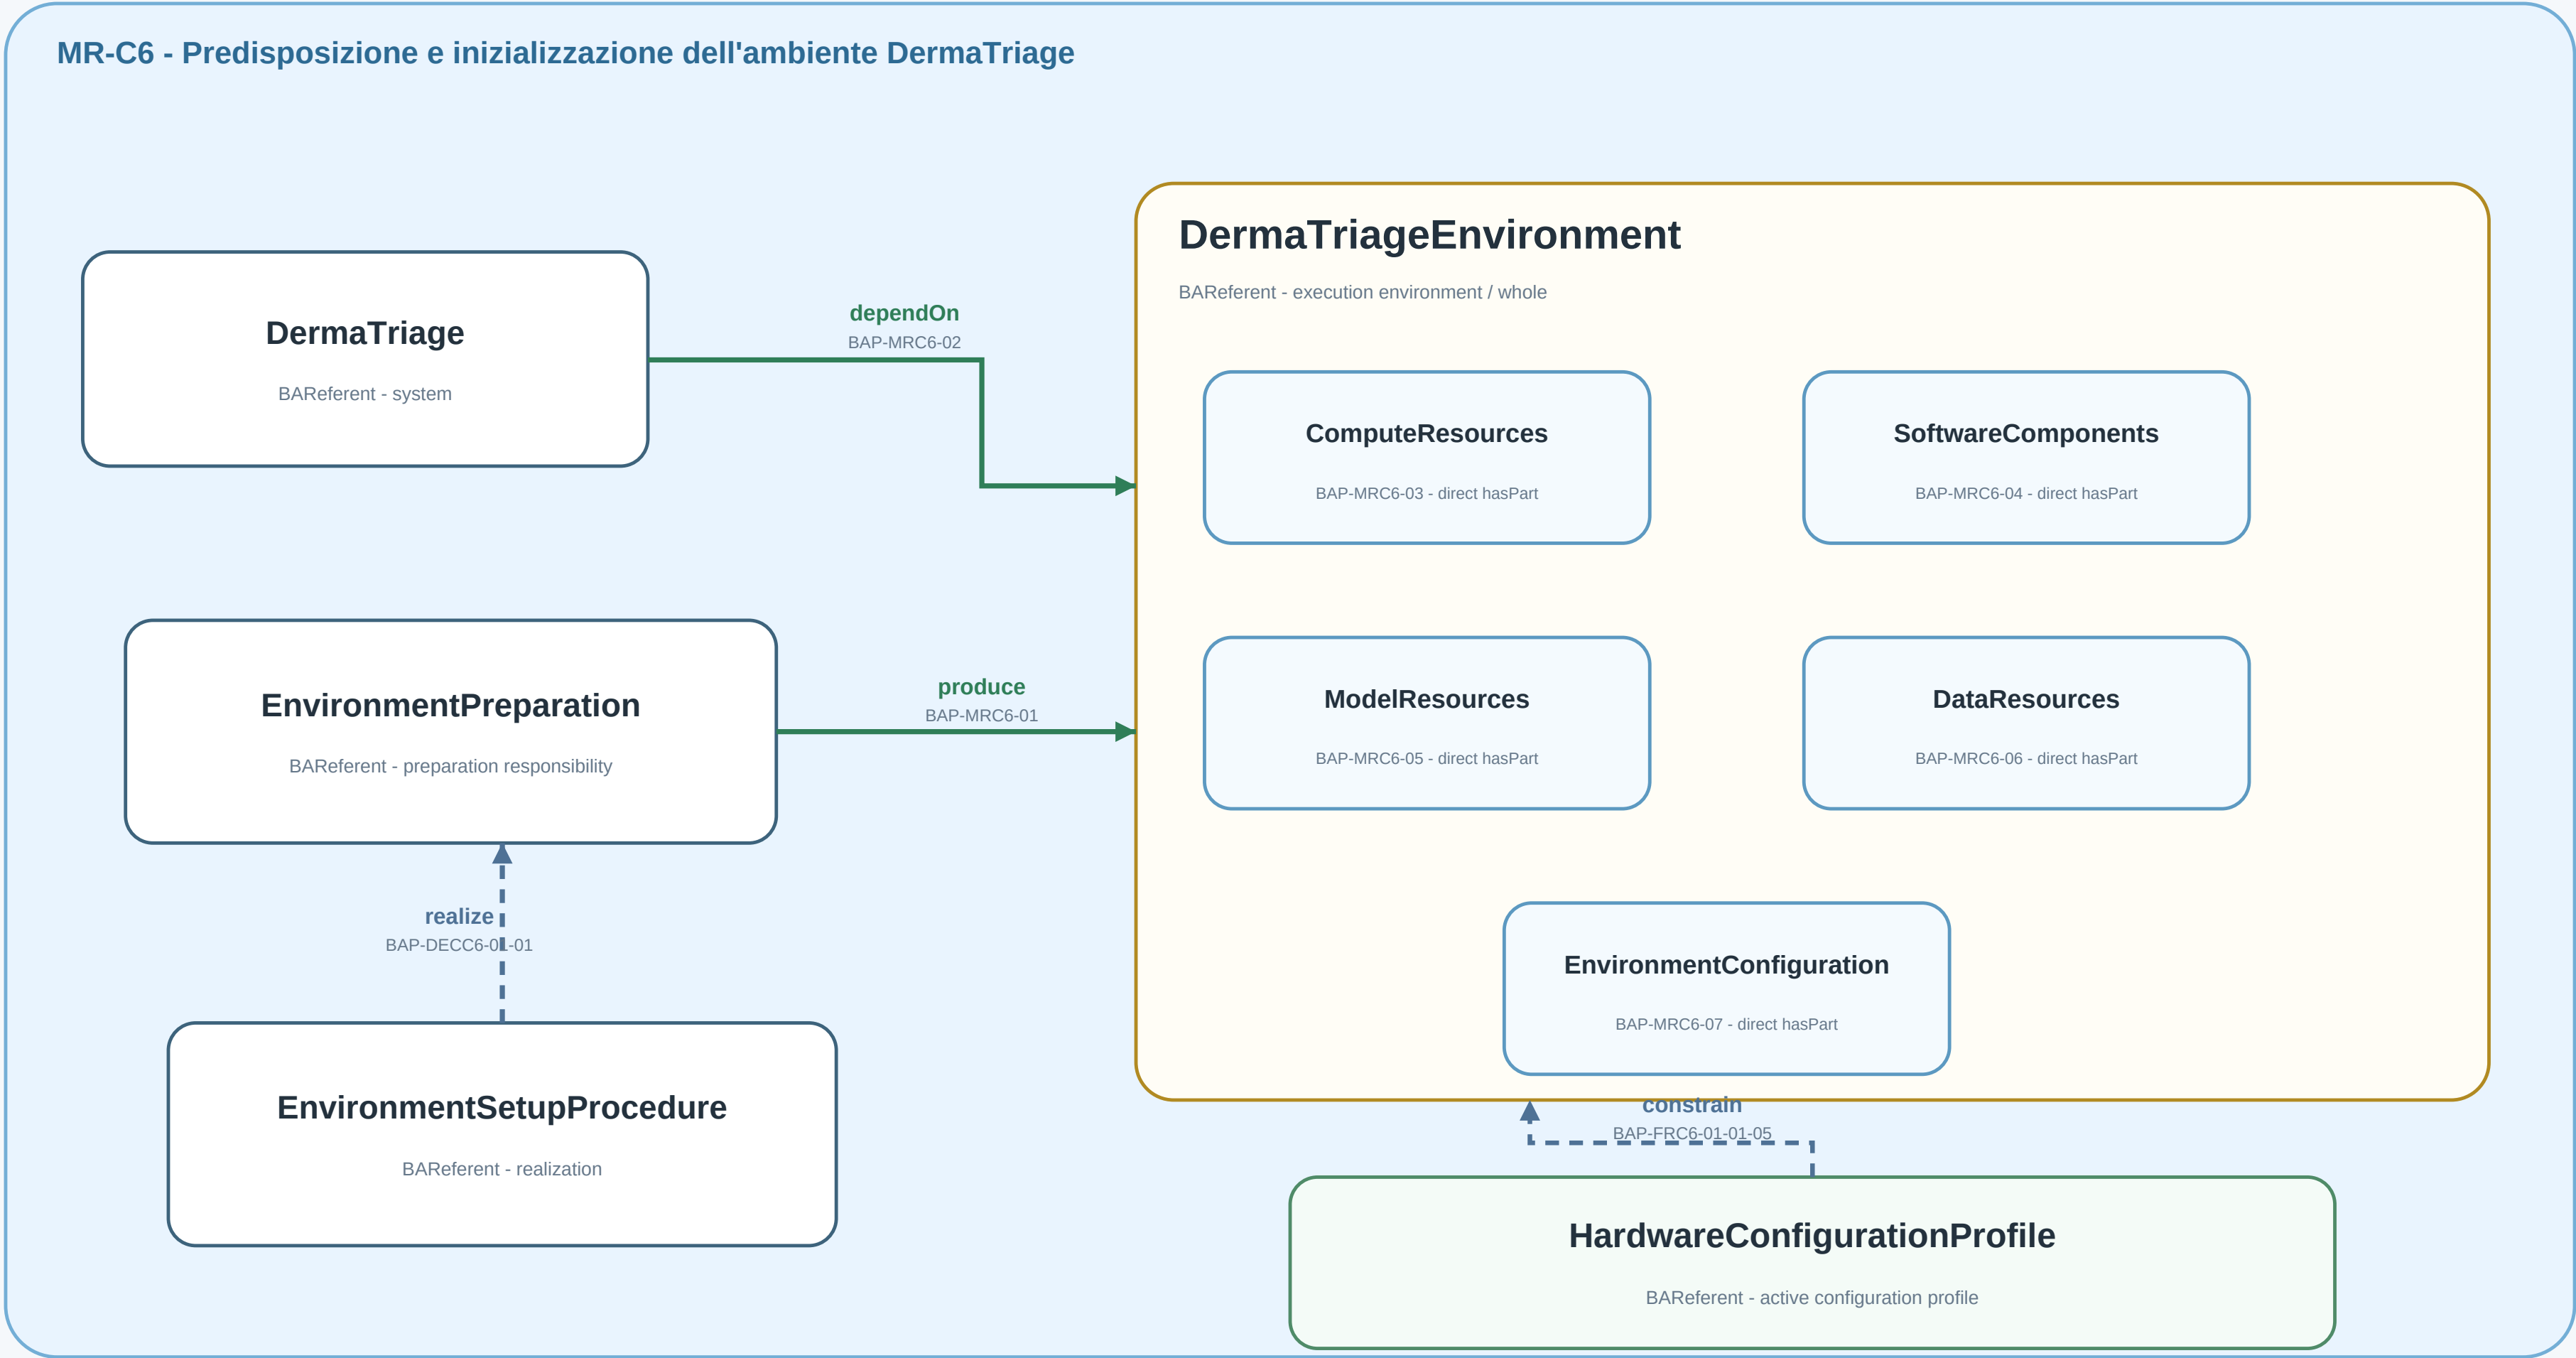

G1 - MR-C6 environment composition

G0 plus direct MR-C6 hasPart composition. Containment inside DermaTriageEnvironment is semantic; no FR-C6-01-01 configuration constraint is projected yet.

G2 - FR-C6-01-01 named hardware configuration constraint

G1 plus accepted BAP-FRC6-01-01-05: HardwareConfigurationProfile constrains DermaTriageEnvironment. The two former candidate dependOn edges from EnvironmentSetupProcedure to resource nodes are removed. Numeric profile detail remains outside this level.

G2 - adds only the accepted named configuration constraint; former FR-C6-01-01 candidate dependOn edges are absent.
